## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

# GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

STATE OF CALIFORNIA  
STATE WATER RESOURCES CONTROL BOARD  
DIVISION OF WATER RIGHTS  
STATEMENT OF WATER DIVERSION AND USE

S9020

*This statement should be typewritten or legibly written in ink.*

- A. Name of person diverting water I. N. Robinson, Jr.  
Address 7000 S. Inland Dr., Stockton, Ca. 95206
- B. Name of body of water at point of diversion San Joaquin River  
Tributary to main stream
- C. Place of diversion 5-7-8  $\frac{1}{4}$  Section 8, Township 1 S, Range 6 E, Mt.-D. B&M,  
San Joaquin County, or locate it on sketch of section grid on reverse side with regard to section  
lines or prominent local landmarks.
- D. Name of works Individually owned

- E. Capacity of diversion works 5000 gpm. cubic feet per second  
gallons per minute  
Capacity of storage reservoir river gallons  
acre-feet  
State quantity of water used each month in gallons or acre-feet
- | Year | Jan. | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total Annual |
|------|------|------|------|------|-----|------|------|------|-------|------|------|------|--------------|
|      |      |      |      | X    | X   | X    | X    | X    | X     | X    |      |      |              |

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.

- Maximum annual water use in recent years \_\_\_\_\_ gallons  
acre-feet  
Minimum annual water use in recent years \_\_\_\_\_ gallons  
acre-feet  
Type of diversion facility: gravity \_\_\_\_\_, pump X  
Method of measurement: weir \_\_\_\_\_, flume \_\_\_\_\_, electric power meter \_\_\_\_\_, water meter \_\_\_\_\_, estimate \_\_\_\_\_ no accurate method  
F. Purpose of use (what water is being used for) Rotation farming--alfalfa, tomatoes, barley,  
etc.

- G. General description or location of place of use (use sketch of section grid on reverse side if you desire)  
NE corner of Bowman & Roberts Rds., nad west side of Roberts at junction of Bowman  
370 A.
- H. Year of first use as nearly as known 1945--pump already on ranch

- I. Name of person filing statement I. N. Robinson, Jr.  
Position Owner Organization \_\_\_\_\_  
Address 7000 S. Inland Dr., Stockton 95206
